## MassDEP North Shore Geographic Response Strategy

## **Marblehead Harbor NS27**

Geograph	hic Response Strategy			Marblehead Harbor NS27
Tactic #	Purpose	Response Equipment	Deployment Resources	Deployment Notes
DV-01a	Redirect spilled oil from one location or direction of travel to a specific site for recovery.	800 ft protected water 7 marine anchor syst 1 shoreline anchor sy 5/25/2016 Testing Date	tem 1 response boats	Tend through tidal changes. Deploy boom as depicted to divert incoming oil to the collection site. Anchor every 200-300'. Adjust angle as necessary to reduce entrainment. Set up shoreside recovery and tend throughout tide. Deploy shoreside anchor first.
DV-01a-alt	Redirect spilled oil from one location or direction of travel to a specific site for recovery.	800 ft protected water 4 marine anchor syst 1 shoreline anchor sy Testing Date	tem 1 response boats	Tend through tidal changes. Deploy boom as depicted to divert incoming oil to the collection site. Anchor every 200-300'. Adjust angle as necessary to reduce entrainment. Set up shoreside recovery and tend throughout tide. Deploy shoreside anchor first.
DF-02	Direct spilled oil away from a location to be protected or to change the course of the slick.	300 ft protected water 2 marine anchor syst 1 shoreline anchor sy Testing Date	tem 2 response boats	Tend through tidal changes. Deploy boom as depicted to deflect incoming oil away from sensitive areas. Anchor every 200-300'. Deploy shoreside anchor first.
EX-03	Prohibit oil slicks from entering a sensitive area	200 ft protected water 1 marine anchor syst 2 shoreline anchor sy Testing Date	tem 1 response boats	Tend through tidal changes. Deploy boom as depicted to exclude oil from sensitive areas. Anchor every 200-300'. Not tide dependent. Deploy shoreside anchor first.
CB-04	Prevent oil that has entered drainage systems from impacting waterways and sensitive areas	1 inflatable plug, san plywood N/A Testing Date	d bag, or 2 shore responders Tested	At low tide deploy appropriate size inflatable culvert plug in the culvert. Monitor to ensure blocking integrity. Without culvert plug, place plywood or similar sheeting material across the culvert. Use plastic sheeting to ensure the seal. Stack sandbags against plywood to counter outflow pressure.
FO-05	Contain and recover spilled oil on the water in the offshore & nearshore environment	1 or more onwater skimmin		Deploy on-water recovery task force(s) in configuration suitable for types of vessels used and sea conditions, with skimming system(s) and temporary storage for recovered oil and water. Location not exact, will move to chase oil.
		N/A Testing Date	Tested	
SR-06	Remove spilled oil that has been diverted to a designated recovery site accessible from	<ol> <li>2 skimming system</li> <li>2 storage tank or bla</li> <li>2 hoses, pumps, fitting</li> </ol>		Set up shoreside recovery tactic at general location depicted on map. Some access points located at private residences. Access may be difficult.

Marblehead Neck DV-01a shoreside recovery location (beach at middle right) at low tide on 02 June 2009. View looks northeast.

Front St DV-01b(alt) shoreside recovery location at low tide on 02 June 2009. View looks southwest.

## Special Considerations & Navigational Hazards

Developed shoreline with riprap, pier pilings, dock, and floats. For the 2 culverts at Riverhead Beach one culvert drains from the town and the other drains from Goldthwait Marsh. Tidal range 7-11ft. Vessel operators should have local knowledge.

Resources Protected					
Marine Mammals	None identified				
Fish	None identified				
Invertebrates	Shellfish, Urchins				
Birds	Nesting Sites, Seabirds, Shorebirds				
Threat/End. Species	None identified				
Cultural	None identified				
Subsistence	None identified				
Human Use	Marina, Boat Ramp, Port/Harbor				
Commercial Fishing	None identified				
Land Management	None identified				
Coastal Habitiat	Beach, Rocky Shore, Tidal Flats
